Biofuels Overview – Update December 2015

Report Categories:

Biofuels

Approved By: Christine Sloop **Prepared By:**

Ornella Bettini

Report Highlights:

Italy's biodiesel capacity stands at approximately 2 Million Metric Tons (MMT). Italian biodiesel operators include two categories: biodiesel producers and oilseed crushers. The latter produce pure vegetal oil for biofuels as well as the agro-food industry.

General Information: Italy's Biofuels Overview – Update December 2015

Biodiesel

Italy's biodiesel capacity stands at approximately 2 Million Metric Tons (MMT). Italian biodiesel operators include two categories: biodiesel producers and oilseed crushers. The latter produce pure vegetal oil for biofuels as well as the agro-food industry. Some of the oilseed crushers also engage in producing biodiesel. Biodiesel in Italy is produced mainly from imported rapeseed (40 percent), soybean (30 percent), and palm oil (25 percent). The remainder is made of recycled vegetable oils, sunflower oil, and animal fats. Rapeseed oil is mostly imported from EU countries (France, Germany, Czech Republic, and Romania), while soybean oil is either imported from the EU or domestically produced from imported beans. Palm oil is chiefly imported by Indonesia and Malaysia. Biodiesel in Italy is exclusively used in blends with traditional diesel for transport or diesel for heating.

Bioethanol

Italy's bioethanol capacity is approximately 215,000 MT per year. Cereals (corn and wheat), wine, and wine byproducts (wine pomace and dregs) are responsible for the majority of the Italian ethanol production. However, only a limited portion of the total output is fuel ethanol, while the remainder is destined to industrial chemicals.
